

INSPECTION + AUDITING  
EMERGENCY RESPONSE  
CONSULTING  
RESEARCH

Good Day,

My name is Ali McIntyre, Consulting Utility Forester for CNUC of Canada. CNUC is conducting assessments of vegetation on behalf of SaskPower along the high voltage powerlines for the circuit 3B-39, in the Regina Rural 8 district. I will be conducting an inventory of all required vegetation maintenance on this circuit and will be notifying all affected landowners of SaskPower's vegetation maintenance plans on their property(s).

I will be starting the vegetation assessment on October 25, 2023, and estimate that I will be finished the field work by November 3, 2023. A follow-up email will be sent when I have completed the field work.

I am driving a white Ford F-150 with CNUC logos on the side.

If you have any questions, please do not hesitate to call, or email me at the contact information below. Alternatively, if I cannot be reached, please call Chris Proulx, CNUC Assessment Supervisor at 306-209-3370.

Thank you,

Ali McIntyre (306)-209-3935
